

I support media diversity

This email is about Docket No. 02-277. I rarely get involved in political issues, but when I heard of the FCC wanting to change the media ownership

rules, I had to say something. We currently have many modes of media, but even now they are narrow and restricted to their media ownership. Our country was based on diversity in voice and political views. It is our leaders jobs to promote the original intent of our country. If we allow all these mergers to occur, we reduce the diversity of voice that was the intent. This is logical, no study is needed to see this issue clearly. If we allow more deregulation, it will not have the effect of freedom of industry, but the opposite. As a country, we criticize communism and dictatorships, but it is time we look at who is controlling our country. Are we paving the way for the people of the United States to run our country, or giant corporations.

Thank You,

Michelle Curtis
